RESEARCH EXPERTISE

Learning Sciences, Technology-mediated Learning (Augmented reality, Artificial intelligence), Mathematics Education, Immigrant Family Engagement, and Mixed Methods

OVERALL AIM: As a learning scientist, my work centers on exploring how technology and intelligent systems—such as artificial intelligence (AI) and augmented reality (AR)—can be leveraged to design innovative learning experiences. I am particularly interested in creating learning environments that make abstract knowledge, such as mathematics and computing, more immersive, tangible, and accessible for learners of all ages.
